What's New for Project Management Center 6.0 Release

Project Management Center (PMC) 6.0 Release implements project improvements and a new quarterly verification of prime and subrecipient place(s) of performance to ensure the locations of work are regularly updated.

Specific Functionality

Updates to STRIPES Initiating Office

- Added new office: MESC

Updates to Program Office

- The Program Office is now a required field when creating a new project or updating an existing project.
- Only active program offices will now appear in the dropdown list when new creating new projects.

New Quarterly Location Verification Process

- Prime and subrecipient place(s) of performance project location(s) are required to be verified as active or inactive, on a quarterly basis according to the following schedule:
  - 1/1 – 3/31 period; location verification due by 4/30
  - 4/1 – 6/30 period: location verification due by 7/30
  - 7/1 - 9/30 period: location verification due by 10/30
  - 10/1 – 12/31 period: location verification due by 1/30
- Once a location is marked as inactive, it will cease to appear starting with the next reporting period.
- All locations where work is being performed are required to be entered for the project.
- Any locations will be initially pre-populated with completed EQ-1 data, if available, thus minimizing data entry.
- Reminder notices to verify location(s) will appear within the PMC to business and technical contacts upon login, starting 30 days prior to the location verification due date.
