

What’s New for Project Management Center 6.8 Release

Project Management Center (PMC) 6.8 Release implements the following updates based on policy updates and user feedback:

- A new question on the Location form for Bipartisan Infrastructure Law (BIL) /Inflation Reduction Act (IRA) projects
- Updated contact information on the NREL NEPA Worksheet
- Updated sorting of State picklists on the Location form, EQ-1, and EQ-2.

Specific Functionality

Recipients: Updated Location Form (applicable to BIL/IRA projects only)

For BIL / IRA awards only, the location form that Recipients are required to complete has a new required question: "Is construction signage installed at this location?" Options include: *Yes*, *No*, or *Planned*.

To access this form, Recipients should navigate to the "Upload Reports" page for their award, and then select "Add Location". This new question aligns with the requirements of the updated BIL/IRA reporting template for [Locations of Work](#) that is posted on energy.gov.

Recipients: EF1 NREL NEPA Worksheet

The NREL NEPA Worksheet is now defaulted to a new NREL NEPA Coordinator: Kurt Schlomberg 303-275-3289 kurt.schlomberg@nrel.gov.

*NREL NEPA Coordinator	*Phone	*Email
Kurt Schlomberg	303 - 275 - 3289	kurt.schlomberg@nrel.gov

Updated State Picklist Sort Order

To minimize confusion, the State picklist is now sorted in alphabetical order by State abbreviation (instead of state name). The newly sorted State picklist appears on the Location form, the EQ-1, and the EQ-2.
